What's New Guide

Sage 200 Standard & Sage for Education

Version 2022 R1

Sage 200 is part of a global franchise which has a single vision and strategy across fourteen countries worldwide to offer companies a leading business management solution

Our progressive strategy is constantly evolving, and each new release is built using customer feedback; ensuring our customers' needs drive our product roadmap. For example, customers are telling us that simplifying their business processes to increase efficiency is key. Our continued response it to improve the customer experience with greater flexibility of access, to enhance productivity daily, which really matters to them.

These customer requests feed into our three strategic pillars that ensure we deliver the right solution for our customers' needs today, and in the future.

Strategic pillars

The three strategic pillars for Sage 200 are;

Web enabling the Sage 200 client with a choice of data deployment options (on-premise or Microsoft Azure), delivering the following key elements:

- Software modernisation with Web Browser based client data entry
- Microsoft Power Apps, Power BI and Power Automate integration
- Flexibility to customise to support business requirements
- Choice of data deployment (Sage 200 Professional only variant)
- Greater accessibility standards - supporting multiple browsers, font sizing and scale as well as technology choice and power to run from new devices e.g., tablets.

Strengthening the core accounting functionality and API development:

- Simplified experience and system flow
- Focus on key accounting processes
- Continued API development

Vertical specific propositions

- Delivering the appropriate feature set for customers, to support their industry requirements.

What's New?

Sage 200 Standard and Sage for Education 2022 R1, released in **March 2022** via automatic deployment, **ensures customers benefit from new web screen functionality and new features to support** customers' sales processes.
