Information on the new
features for Sage 200
Professional, Standard and
Sage for Education

Sage

February 2024

Our progressive strategy is constantly evolving, and each new release is built using customer feedback; ensuring customers' needs drive our product **roadmap**.

We're focused on a number of key aspects:

- Simplifying your business processes and increasing efficiency,
- Modernising the software with greater flexibility of access to enhance productivity

These key elements define the 3 key elements of our product strategy:

1) Web enabling the Sage 200 product, choice of deployment options (on-premise or Microsoft Azure), delivering the following key elements:

- Software modernisation with Browser access
- Integration with Microsoft Power Apps, Power BI and Power Automate
- Flexibility to customise to support business requirements
- Choice of data deployment (Sage 200 Professional only)
- Greater accessibility standards - supporting multiple browsers, font sizing and scale as well as technology choice and power to run from a range of devices e.g., tablets

2) Strengthening the core accounting functionality and building our API capabilities

- Simplifying user experiences and system flow
- Focus on key accounting processes
- Continuous API expansion

3) Industry specific functionality

- Delivering appropriate features for customers to focus on their industry specific requirements

New Features

2024 R1

Released in February 2024 for all Sage 200 product variants, this release includes new Web Screens, alongside major improvements to new and updated API endpoints and migration tools.

The new features and enhancements are designed to elevate your experience with Sage 200.

Better user experience, greater flexibility with new web screens

Web Screens – Purchase Orders, Create, Amend, View

This release of Sage 200 (all variants) includes POP dispatch web screens providing the ability to do purchase order entry, amendment and view within a browser.

New Features

2024 R1

SPC Azure Image

Updates to SPC – Microsoft Azure VM Image

Deploying the latest images unlocks a wider number of benefits including keeping up to date with Microsoft product lifecycle.

An interface tailored to your device

Responsive Design for Sales Orders & Quotes: New, Amend, View

Our responsive design enables the automatic adaption of the order screen to fit whatever device you're using. Streamlining the path to keep our customers up to date, compliant and enjoying the new features.

Changes to URLs for Ideas Portal

Access our new ideas to have your say.

[Sage 200 Ideas Portal](#)

Changes to URLs for Opayo (formerly Sagepay)

Changes to update payments.

Please note that these changes are for Sage 200 Professional and SPC. Sage 200 Standard and Education will be available in Sage 200 2024 R2.

Changes to exporting data to Excel

Simplify and deliver consistency of how to export files from self-service, and the product grids to a file download that you can then open in your system of choice.

Technical changes to allow data exports, usually associated with a desktop installed Excel to move to a 'save as' rather than an open direct in application.
