Sage 200 2025 R2

What's New Guide: Information
on the new features for Sage
200 Professional, Standard and
Sage for Education

November 2025

Sage

You asked. We Delivered.

The Sage 200 R2 release in November 2025 is built around **you**—our customers, developers, partners, and users. Every feature, enhancement, and retirement reflect your feedback, your needs, and your desire for a more intuitive, efficient, and future-ready business management solution.

This release empowers you to save time, reduce errors, and work smarter—because you asked, and we listened.

With new and enhanced features like read-only user roles, automated login management, function key shortcuts, and bulk import/export enhancements, you can:

- ✓ **Cut hours of admin time** from repetitive tasks
- ✓ **Respond to customer queries faster** with clearer data and better visibility
- ✓ **Streamline compliance and audit prep** with built-in reporting and access controls
- ✓ **Work flexibly and remotely** with modern web screens and cloud-ready infrastructure

This release isn't just an update—it's a meaningful step forward in how Sage 200 helps you run your business.

New Features in R2

Released in November 2025 for all Sage 200 product variants, this release includes a variety of new features and customer requested enhancements designed to elevate your experience with Sage 200.

Customer-Led Innovation, automation & efficiency

We've listened, prioritised, and delivered on what matters most—your ideas.

With 8 customer-driven enhancements backed by over 500 votes, we're helping you save time, reduce complexity, and improve control. Practical automation and efficiency upgrades mean less manual effort and more time for growth.

Modernisation & Cloud Readiness

Faster, more flexible, and future-ready experience—empowering your teams to work smarter, wherever they are.

Enhancements designed to streamline your operations and support your journey to the cloud.

Developer and Partner Enablement

Strengthen your ecosystem—empowering developers and partners with the tools, access, and confidence to deliver integrated solutions faster.

Enabling smoother collaboration and faster innovation across the Sage 200 partner network with new API endpoints and pre-release access.

Security and Compliance

Greater confidence in your systems, data, and processes—helping you stay secure, compliant, and audit-ready.

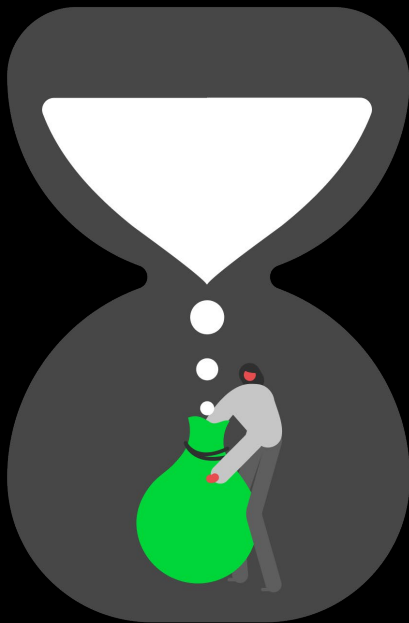

Strengthen your business's security posture and operational control through a combination of strategic initiatives and practical tools.

Maintenance that makes a difference

Maintenance That Matters: Evolving for Efficiency and Security

We're retiring outdated modules and platforms to deliver smarter, more secure solutions. These upgrades ensure smoother transitions, reduced complexity, and performance tailored to your evolving business needs.

Customer-Led Innovation, automation & efficiency

Disconnected Logins

Minimise Downtime and Support Load with Automated Login Management

A top-voted idea ([136 votes](#)) now enables automatic clearing of disconnected logins every 30 minutes in Professional, reducing user lockouts, support tickets, and improving system stability.

Variants: Professional and SPC

[Sage 200 Professional](#)

User Reports

Enhance Visibility and Audit Readiness with User Role Reports

Responding to 120 [customer](#) votes, this Professional-only feature allows XML export of role-feature mappings, giving IT managers and auditors a clear view of permissions and reducing manual tracking and compliance risk.

Variants: Professional and SPC

Find out more in the product help:

[Sage 200 Professional](#)

Read Only User

Simplify Compliance with Read-Only User Roles

This long-requested feature ([87 votes](#) since 2015) introduces predefined roles and XML templates for Sage 200 Professional and Standard, enabling faster setup, consistent access control, and reduced partner implementation time. It supports audit readiness and lowers onboarding costs.

Variants: Professional and SPC, Standard & Education

Security and Compliance

Defect Resolution

Ensure seamless operations

By identifying and addressing issues early, we provide a more reliable and stable product experience, minimising downtime and costly disruptions.

Available in: Desktop & Web

Opayo field changes

Ensure Smooth Payments with Extended Opayo Field Support

Increasing the Scheme Trace Number field to 6000 characters resolves payment failures, reduces manual reconciliation, and improves reliability of Opayo-integrated environments.

Variants: Professional, SPC, Standard & Education

Updated Report Designer

Empower Reporting with the Latest Designer Version

Report Designer v7.0.76.0 brings improved stability, compatibility, and new features, enabling finance teams and partners to build reports confidently and reduce errors.

Variants: Professional, SPC, Standard & Education

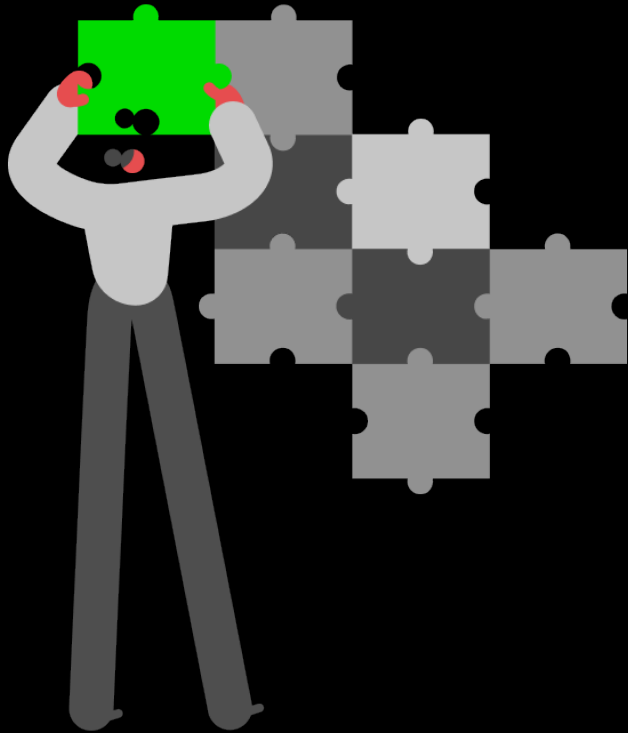

Architectural Modernisation

Future-Proof Architecture with Azure

Sage 200 Standard and Education are transitioning to serverless architecture, improving scalability, reducing infrastructure overhead, and aligning with Microsoft's cloud-first strategy.

Variants: Standard & Education

Maintenance that makes a difference

Removal of Sage 200 Manufacturing Module from the product.

Transition to Richer ISV Manufacturing Solutions

Retirement of the built-in Manufacturing module enables customers to adopt more advanced, scalable ISV solutions tailored to industry needs, reducing complexity and unlocking innovation.

Variants: Professional

Removal of Windows Server 2019 as a supported platform

Modernise Infrastructure by Ending Support for Windows Server 2019

Aligns with Microsoft lifecycle policies, improves security, and encourages customers to upgrade to Server 2022 for optimal performance and compatibility.

Variants: Professional

Removal of Windows 10 as a supported platform

Upgrade to Windows 11 for Enhanced Performance and Security

Sage 200 ends support for Windows 10, ensuring customers operate on modern, secure platforms and reducing risk of compatibility issues.

Variants: Professional
