Information on the new
features for Sage 200
Professional, Standard and
Sage for Education

Sage

August 2022

Our progressive strategy is constantly evolving, and each new release is built using customer feedback; ensuring customers' needs drive our product **roadmap**.

We're focused on a number of key aspects:

- Simplifying your business processes and increasing efficiency,
- Modernising the software with greater flexibility of access to enhance productivity

These key elements define the 3 key elements of our product strategy:

1) Web enabling the Sage 200 product, choice of deployment options (on-premise or Microsoft Azure), delivering the following key elements:

- Software modernisation with Browser access
- Integration with Microsoft Power Apps, Power BI and Power Automate
- Flexibility to customise to support business requirements
- Choice of data deployment (Sage 200 Professional only)
- Greater accessibility standards - supporting multiple browsers, font sizing and scale as well as technology choice and power to run from a range of devices e.g., tablets

2) Strengthening the core accounting functionality and building our API capabilities

- Simplifying user experiences and system flow
- Focus on key accounting processes
- Continues API expansion

3) Industry specific functionality

- Delivering appropriate features for customers to focus on their industry specific requirements
