What's New Guide:
Information on the new
features for Sage 200
Professional, Standard and
Sage for Education

Sage

June 2025

Our retain and expand strategy is supported by each new release, built using customer feedback; ensuring customers' needs drive our product **roadmap**.

We're focused on a number of key aspects:

- Simplifying your business processes and increasing efficiency
- Modernising the software with greater flexibility of access to enhance productivity

These key elements define the 3 key elements of our product strategy:

1) Web enabling the Sage 200 product, choice of deployment options (on-premises or Microsoft Azure), delivering the following key elements:

- Software modernisation with Browser access
- Integration with Microsoft Power Apps, Power BI and Power Automate
- Flexibility to customise to support business requirements
- Choice of data deployment (Sage 200 Professional only)
- Greater accessibility standards - supporting multiple browsers, font sizing and scale as well as technology choice and power to run from a range of devices e.g., tablets

2) Strengthening the core accounting functionality and building our API capabilities

- Simplifying user experiences and system flow
- Focus on key accounting processes
- Continuous API expansion

3) Industry specific functionality

- Delivering appropriate features for customers to focus on their industry specific requirements

New Features

2025 R1

Released in June 2025 for all Sage 200 product variants, this release includes a variety of customer requested enhancements, new Web Screens, alongside major improvements to new and updated API endpoints and migration tools.

The new features and enhancements are designed to elevate your experience with Sage 200.

Stay informed with Stock Item Alerts

Extending our alerts capability to cover stock. Instantly see important notifications related to stock items, share key information and drive operational efficiencies with their use. Flexible implementation to support customers varying requirements, available within the Sales Order, Purchase Order, and Invoicing modules. Key benefits: avoid stockouts, overstocking, lost sales, customer churn due to poor service, production interruption, waste of time in manual inventory monitoring.

Support for Microsoft Windows Server 2025

Ensuring our product is in sync with Microsoft's product release cadence, giving customers and partners the confidence in deploying our solution with this tested & supported platform.

Maintenance updates

On a regular basis, we update a number of items for Sage 200, this includes:
Defect resolution and updates to our Azure infrastructure and security enhancements.
Additionally, in this release, we are retiring the Microsoft Skype integration from our product.
