Sage for Education

Sage

August 2023

Our progressive strategy is constantly evolving, and each new release is built using customer feedback; ensuring customers' needs drive our product **roadmap**.

We're focused on a number of key aspects:

- Simplifying your business processes and increasing efficiency,
- Modernising the software with greater flexibility of access to enhance productivity

These key elements define the 3 key elements of our product strategy:

1) Web enabling the Sage 200 product, choice of deployment options (on-premise or Microsoft Azure), delivering the following key elements:

- Software modernisation with Browser access
- Integration with Microsoft Power Apps, Power BI and Power Automate
- Flexibility to customise to support business requirements
- Choice of data deployment (Sage 200 Professional only)
- Greater accessibility standards - supporting multiple browsers, font sizing and scale as well as technology choice and power to run from a range of devices e.g., tablets

2) Strengthening the core accounting functionality and building our API capabilities

- Simplifying user experiences and system flow
- Focus on key accounting processes
- Continuous API expansion

3) Industry specific functionality

- Delivering appropriate features for customers to focus on their industry specific requirements

New Features

2023 R2

Released in August 2023 for all Sage 200 product variants, Sage 200 2023 R2 marks a significant milestone, building upon the web features introduced earlier and bringing you even greater flexibility and customisation options.

Web Amendability: Web screen customisation capabilities for Sage 200 Professional

Bringing the same level of customisation capability to the web that you have on the desktop. Enabling you to enjoy the wide range of customisations and add ons in the Web, opening up Sage 200 to a whole new range of possibilities.

Using a variety of approaches, from a new low code/ no code data driven approach, all the way through to harnessing the full power of the JavaScript ecosystem.

Building on the fantastic capabilities of the Sage 200 Software Developer Kit (SDK), we're also introducing the ability to amend existing Sage 200 API and add your own. This offers even more opportunities for integrating with Sage 200.

Visit our brand new [Sage 200 Developer Website](#) or our new dedicated [Sage 200 Developer Forum](#) for more information.

Web Amendability: Web screen customisation capabilities for Sage 200 Standard

Introducing the new capability to customise Sage 200 Standard! Bringing to the fore a whole range of possibilities with customisable Web Screens.

The ability to add your own fields to Web Screens allows you to store, validate, update & retrieve data that is specific to your business needs.

Visit our brand new [Sage 200 Developer Website](#) or our new dedicated [Sage 200 Developer Forum](#) for more information.

Web Amendability: Web screen sample apps

Three new sample apps that have been built with the new web customisation tools are now available to help understand the power and capability our new Web Amendability model provides. These apps are practical examples designed to show how our customers can take advantage of the new customisation capabilities available in the web, to fine tune their Sage 200 solution. These apps enable you to:

- Sales Order: Save contract number and line item delivery instructions
- Stock record: Manage quality assurance details and supplier classification, with new fields *
- Customer record: Keep track of customer communications, with new tab and record entry fields.*

Contact your Business Partner for further information.

New Features

2023 R2

Maintenance of line updates

IT technology is a fluctuating environment and as operating systems, and solutions which Sage 200 integrates with, evolve, it is vital we adapt and update Sage 200 to maintain the latest security protocols and user experience.

Therefore, this release includes several minor improvements which include:

- Change from Windows O/S to Windows 11 Multisession on Sage Partner Cloud deployments
- Updates to banking and invoice payments components
- User interface updates based on branding changes
- Known issue resolution

Republic of Ireland - Intrastat

Intrastat compliance for Republic of Ireland (double digit nature codes)

Migration tool update

Optimisation of the Sage 50 Accounts to Sage 200 migration tool, in order to remain technically compliant with latest Sage 50 Accounts releases. Sage 50 Accounts migration tool now covers v29.2.
